- 3) Right to stop others
- 5) Competitive Advantage

- 2) Patenting is Prestigious
- 4) Earn through self use/licensing/sell
- 6) Projecting research abilities

OUR VIEW ON PATENT SEARCHES

Patents are filed by the business Entity or individual to enjoy the monopoly over the innovations & inventions, so that they can gain maximum benefit for next 20 years. Patents are awarded if the invention has (World Wide) Novelty, Inventive step/Non obviousness and Utility.

For developing a new product, lot of R&D is required which requires cost, manpower and time. If the patent is not granted due to similar finding in the prior art. It is a great disappointment to the investors and also to the inventors.

To avoid reinventing the wheel, search should be conducted. Further, huge cost is involved if the product also gets into litigation due to infringement. To minimize the risk of rejection and litigation it is always preferred to conduct a search.

OUR HAPPY CLIENTS
